Webpack
Docker
Prisma

PERSONAL SKILLS

Desire and ability to learn
Critical thinking
Teamwork
Time Management
Adaptivity

ENGLISH

ENG - B1 (Intermediate)

ABOUT

Hello, I'm Henadzi! I was first introduced to the world of front-end development in 2021. Since 2022, I have completely immersed myself in this area and don't get tired of learning new technologies for me.

I am constantly working on improving my skills,expanding my stack to use the best technologies and techniques in every project that I do. At the moment I want to work in a team that uses advanced technologies and make a truly high-quality product.
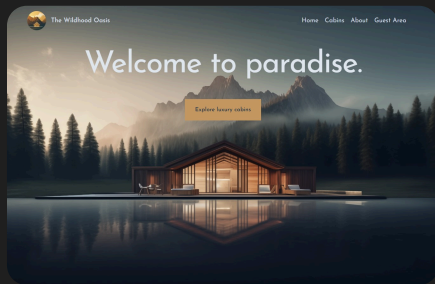

EXPERIENCE

2019-	Freelance (Web-developer, youtube creator, geolog))
2017- 2019	"NII Belgiprotopgas" team-lead of geology group
2015- 2017	"NII Belgiprotopgas" geolog
2012- 2015	OOO "Geoplus" geolog

PROJECTS

- **The Wildhood Oasis Hotel**
  Hotel website. Individual Project. Next.js
  Authorization (NextAuth with OAuth - Google account)
  After authorization, you can book a room, track, change and delete your previous reservations, and the ability to edit the client profile is also available.
  Stack: Typescript, Next.JS, NextAuth, Tailwind CSS, Supabase

  [Demo] [Code]

- **CleverFit**
  Fitness app. Individual project.
  Authorization (JWT and OAuth with Google account).
  Pages: CALENDAR, TRAINING, ACHIEVEMENTS, PROFILE, SETTINGS, REVIEWS, registration, authorization, result pages.
  Completed in 7 sprints with Cypress testing.
  Read more about the implemented functionality - **HERE**
  Stack: Typescript, React, Redux Toolkit, Ant design

  [Demo] [Code]

- **SuperBoards**
  A project management app that allows you to manage tasks and monitor their progress within a team.
  Authorization, localization, API, DnD, teamwork.
  Full functionality after registration
  Stack: Typescript, React, Redux Toolkit, MUI, React DnD, React Hook Form, I18Next, SaSS and other

  [Demo] [Code]

- **Genoli**
  Online store with filtering, sorting, and search. It is possible to add to favorites, cart, and the ability to select additional options for products. Individual project.
  Stack: Typescript, React, Zustand, SaSS and other

  [Demo] [Code]

- **Virtual Keyboard**
  The keyboard supports the functionality of a standard Windows keyboard. There is a **speech-to-text recognition** function (you need to provide access to the microphone in the browser). Working with DOM using JS and simple CSS, without HTML.
  Stack: JavaScript, CSS(SaSS)

  [Demo] [Code]
